

Accountability Systems through Tier Management

Does your management system support your improvements?

Sign up for Lean Leadership offered the same day at same venue and save
This course is part of our "Building High Performance Leaders" series*

This workshop presents a concise, behavior-based model with specific management tools. The Lean management system is built on a tier structure with practices, tools and behaviors that address organizational issues in order to strengthen integration of the "hardware" and "software" of Lean for sustained success.

Course Objectives

Using practical case studies, real life experience and active participation, the instructor presents the interdependent facets of the Lean management system. The participants will learn how to make cultural, organizational and managerial changes to build a process -dependant Lean management system.

- Dynamic of the Lean culture
- Tier management supporting PDCA and A3 thinking
- Layered leader standardized work
- Accountability systems with leadership supportive model
- Skills and behaviors to build the lean management system

Who Should Attend: Company leaders responsible for implementing Lean initiatives, team members who support Lean conversions and implementations, and lean leaders from any level of the organization.

Tuesday, November 30, 2010 1:00 p.m. - 5:00 p.m

About the instructor:

Didier Rabino has worked in Europe and in the United States for the past 18 years leading lean conversions across a dozen plants at Steelcase Inc. and Andersen Corporation. At Steelcase, he worked with David Mann, author of *Creating a Lean Culture*, while the company implemented its Lean culture. Didier is also the creator of renowned lean tools like the accountability board.

Didier holds a Wood Mechanical Engineering degree from the University of Nancy, France, a Business and Administration degree from the University of Perpignan, France and a Masters degree in Industrial Sciences from Louis Pasteur University in Strasbourg, France
