Every new design or design/process change should be preceded by an FMEA. This will convert qualitative concerns into specific actions, identify what negative effects could occur, and make sure that all possible ramifications are understood. FMEA will also guide you to reduce unforeseen problems, highlight concerns of both the customer and internal process owners and keep people attuned to risks associated with planned implementations.

Course Objectives

After completing this workshop you will know:

- ◆ What an FMEA is.
- ◆ The purpose and benefits of an FMEA.
- ◆ The different types of FMEA.
- ◆ How to generate a Design FMEA.
- ◆ How to generate a Process FMEA.
- ◆ How to interpret a Risk Priority Number (RPN) in a Lean system.
