*"I really like the personal experience and lessons learned that were shared by the presenters."*

Aaron Lehto,  
Nexen Group Inc

Understanding frustrations among employees and customers is a good place to find motivation to improve. Ideas and complaints come easily. But by ensuring everyone has a similar improvement language and perspective you can go a lot further. Teaching all employees how to identify common forms of waste will significantly accelerate your pace of improvement! Join us to hear examples from local practitioners, with different operating environments and company cultures, how they have helped their employees be on the same page to really see waste.
