

Accountability Systems through Tier Management and Tour of Honeywell

Does your management system support your improvements?

Your instructor:

Leigh Erickson is a Senior Operations Manager at Honeywell where he leads their integrated supply chain organization.

See accountability systems with communication supporting problem solving, visual metrics and layered, leader standard work. The Lean management system is built on a tier structure with practices, tools and behaviors that address organizational issues in order to strengthen integration of the “hardware” and “software” of Lean for sustained success. Learn and see live applications on site.

Course Objectives

Using practical case studies, real life experience and active participation, the instructor presents the interdependent facets of the Lean management system. The participants will learn how to make cultural, organizational and managerial changes to build a process-dependant Lean management system.

- Dynamic of the Lean culture
- Tier management supporting PDCA and A3 thinking
- Layered leader standardized work
- Accountability systems with leadership supportive model
- Skills and behaviors to build the lean management system

Who Should Attend: Company leaders responsible for implementing Lean initiatives, team members who support Lean conversions and implementations, and lean leaders from any level of the organization.
