

Advanced Kanban Systems

Techniques and practices to improve pull systems

About the instructor:

Didier Rabino is Lean Sensei at HealthEast Care System. He has coordinated the development and deployment of the organization's Lean system and has provided coaching at all levels of the organization. He has worked in Europe and in the United States for 20 years leading and supporting Lean transformations and new process implementations.

Pull systems and Kanbans are tools and concepts that can be used across the whole value stream. Over the years, Kanban systems have been developed and adapted to support very specific needs. They can be found to manage a finished goods supermarket, to schedule batch process equipment, to manage and reorder purchased parts, to deliver material to an assembly line or to level production across an entire mixed model value stream. All these types of pull systems help to simplify decision making, improve cash flow and provide superior delivery performance. This workshop demystifies many versions of Kanban systems. Participants learn many practical details that make a difference in the effectiveness of the supply chain.

Course Objectives:

Learn techniques and practices to develop and improve multiple types of kanban systems.

- Pull concepts review (PFEP, pitch, supermarket, kanban, etc)
- Move or withdraw kanban systems (routes, cards, addresses, etc)
- Production or make part kanban (signal, accumulation)
- Purchased part kanban (with or without minimum buy)
- Finished goods kanban (production leveling)

Who Should Attend: Individuals who are involved in Supply Chain Management, Planning, Operations, Materials and Inventory Control, Purchasing, Logistics, Distribution and Warehousing.

Wednesday, May 29, 2019 8:00 a.m. - 4:00 p.m.

Fee: **MA members** \$369 per person **Non-MA members** \$489 per person
Receive a 10% discount if you register 14 days prior to the event

Location: **Manufacturers Alliance Training Center**
8421 Wayzata Blvd, Suite 190
Golden Valley, MN 55426
