

# Mistake-Proofing

Poka-Yoke techniques to eliminate defects

**Your instructor:**

**Sam Wagner** has led continuous improvement, quality, and manufacturing teams in the Aerospace, Construction, and Plastics industries for more than 20 years. He is a frequent presenter of best practices at both local and international conferences.

People don't want to make mistakes, but all workers make them. Learn how simple Poka-Yoke (error proofing) devices can keep mistakes from turning into rejects, equipment damage or accidents. Achieve the reliable, continuous flow of Lean manufacturing.

**Course Objectives**

Understand the philosophies, techniques and devices that great companies use to strive for zero-defects. Alignment devices, detection equipment, sensing switches, counters and checklists are just a small part of the overall approach. Join your peers to learn and see:

- ◆ What the research says about making mistakes
- ◆ Four elements of mistake-proofing
- ◆ Multiple methods and Poke-Yoke devices used to prevent errors
- ◆ Tools to encourage the discovery and correction of errors
- ◆ Techniques for involving your workforce in mistake-proofing

*Participants will practice the 4-step process of mistake-proofing on actual workplace issues they bring to the workshop. Return to work with ideas for solving your mistake-proofing problems!*

**Who Should Attend:** Managers, production supervisors, quality assurance, design engineers and all those involved in error-free results.
