

Continuous Improvement Idea Systems

Your instructor:

Brad Graetz is an engaged Lean leader with over 18 years of Lean experience at a variety of manufacturing companies

Successful companies understand the competitive edge that can be gained by engaging their workforce in implementing daily improvements. However, just asking for suggestions without having a way to deal with them can result in overwhelming a company's resources and frustrating everyone. Discover effective tools and methodology for developing a continuous improvement idea system that builds teamwork, energizes employees, and builds a sustainable competitive advantage for your business.

Course Objectives

Learn how to design and implement an effective continuous improvement idea system tailored to your business. Address the factors critical to successfully engaging your employees in generating and implementing thousands of great ideas, including:

- Why the suggestion box doesn't work
- Key elements of an effective continuous improvement idea system:
 - ◆ Process design
 - ◆ Identifying ideas
 - ◆ Education and training
 - ◆ Support by leadership
 - ◆ Recognition
- The skills front-line leaders need to master
- How to overcome barriers to effective implementation
- How to manage, sustain and continuously improve the system

Who Should Attend? Executives, Managers, Supervisors and Continuous Improvement Specialists whose companies are ready to unleash the problem solving capabilities of their employees and use an effective continuous improvement idea system.
