

Building Your Maintenance System & Culture

Maintenance is a valuable and key part of your continuous improvement

Your instructor:

Lawrence Harer has been in manufacturing for over 25 years. He has over 20 years in the industrial maintenance field working with CMM and EAM systems. Over the past 20 years, he has been applying the principles of TPM, PM, AM and Lean to drive Cost Out and Cost Avoidance in the maintenance/facility departments.

In this workshop, we will learn how to build and maintain a robust preventative maintenance system from the ground up. Learn how to ensure the success of your PM program using the fundamentals of Lean, 5S, Autonomous Maintenance and culture change. Through interactive breakout sessions, we will discuss and build processes that you can take back and implement immediately. Building a maintenance program to move from reactive maintenance to preventative maintenance is a long-term process, and this workshop will layout the path for an enjoyable and productive journey.

Topics include:

- ◆ The difference between EAM and CMMS
- ◆ How to implement and maintain a PM program
- ◆ Building a culture to support the journey
- ◆ The roles and responsibilities of everyone in the facility to ensure success
- ◆ Cost Out / Cost Avoidance through a PM program
- ◆ Metrics / Lean / Autonomous Maintenance as part of your PM program

Typical benefits include:

- ◆ Increased machine uptime
- ◆ Improved teamwork
- ◆ Choosing the right mix of preventative & autonomous maintenance
- ◆ Reducing the right costs
- ◆ Better engagement of the maintenance & production team

Who Should Attend?

- ◆ Maintenance leads / supervisors / schedulers
- ◆ Facility managers / Engineers
- ◆ Anyone interested in improving the maintenance culture of their facility
