

# 2 Tools to Prioritize Your Problem Solving

Learn how Pareto Charts and Control Charts can keep you focused on the greatest opportunity for improvement.

If you have ever expected results more quickly, solved the “wrong” problem, or overreacted to an unexpected problem that only happened once then you and your team will want to attend.

In this online seminar your peers will show you what has worked and what hasn’t when using these tools so that you can leverage their experience as your own.
