

# CREATING PROCESS MAPS

:::::::::::

Learn how Lean mapping reduces process timelines while improving quality and delivery. Map real processes, master pre and post-mapping tools, and apply a simple 3-step change management process for successful deployment and sustainment.

## YOU'LL LEARN TO:

- ✓ Apply Lean principles to mapping for process improvement
- ✓ Conduct swim lane, value stream, mapping, and spaghetti diagrams
- ✓ Use prework and post-mapping tools effectively
- ✓ Implement a 3-step change management process
- ✓ Deploy and sustain successful process improvements

## DESIGNED FOR

Operators, Engineers, Leads, and Supervisors with 2+ years of experience

**Manufacturers Alliance**  
Providing Training & Education Peer to Peer
